Mechanical Contractor _____

Model / Quantity VX 110 _____ VX 150 _____
 VX 199 _____

Date _____

Fuel Type: Natural gas Propane Propane
 (from factory) (field conversion)

Features

- ASME approved high quality 439 stainless steel pressure vessel
- Performance maximized through a multi-tube, counter-flow fire-tube heat exchanger design
- Vertical combustion chamber and down-firing burner allow free gravity drainage of condensate
- 50 psi maximum pressure
- Metal fiber knit burner
- Direct spark ignition
- Brushless DC fan
- Zero governing gas valve
- Boiler shipped with 30 psi relief valve

SIM + (Safety Ignition Module)

- SIM+ certified to CSA STD C22.2 #60730-2-5 and Conforming to UL STD 60730-2-5 & ANSI STD Z21.20
- Provides ignition, flame proving and safety monitoring, including:
 - » Electronic, probe-type Manual Reset Low Water Cut-Off
 - » High Vent Temperature safety limit
 - » Internal Automatic Reset after 5 minutes, Electronic High Limit with verification test
 - » Fan operation control
 - » DC gas valve control

Certifications

- Constructed in accord with ANSI Z21.13-2017, CSA 4.9-2017 and the ASME Boiler and Pressure Vessel Code, Section IV and bear the H stamp as per ASME code.
- SIM+ certified to CSA STD C22.2 #60730-2-5 and Conforming to UL STD 60730-2-5 & ANSI STD Z21.20

Boiler Control

- Clear LCD display with new, user-friendly “app-like” interface
- Outdoor Reset function modulates boiler water temperature according to outside air temperature
- Internal multiple boiler staging and rotation control for management of up to 4 boilers
- Software upgradable by internet or by USB port
- Accepts an external 0-10 VDC or 4-20 mA input signal
- Multiple load control with relays for five pumps
- Prioritizes up to 4 temperature circuits electrically for maximum fuel efficiencies
- Zoning feature for control of up to four load pumps for identical temperatures
- Load combining software for simultaneous running of compatible loads
- Load configuration save and export to USB
- Summer shutdown programmable by load
- Automatic altitude compensation to 12,000 ft
- Electronic water pressure sensing, for digital display of system pressure
- Two Interlock connections allowing external devices to effect a boiler safety shut-down
- Alarm dry contact for connection to external device
- Error log with detailed conditions capture
- User-defined unoccupied mode and DHW tank temperature (when using sensor)

- Variable speed output signal
- Easily set up load parameters
- Thermostat ground terminal for power-stealing thermostat wiring
- Electronic ΔT fence of 40°F (22.2°C) to prevent thermal stress to boiler

Warranties

- For residential applications, the boiler carries a five (5) year limited warranty on parts.
- For residential applications, the boiler heat exchanger carries a 15 year warranty with registration, according to the following terms: 0-10 years (full 100% warranty), 11-15 years (25% warranty), or a five (5) year limited (100% warranty) with no registration.
- For commercial applications, the boiler has a five (5) year limited warranty on the heat exchanger, and a two (2) year limited warranty on parts.

IBC Portal

- Registering through an Ethernet connection gives remote access to controller functions
- Technician’s View optimized for a browser
- Contractor or end user can receive email alerts for error states
